

axis

Therapy Bench

Support at every level

Available in 3 sizes, the **axis** pediatric therapy bench is designed to support children and learn better posture and balance. It helps achieve maximum hand and arm movements for learning, playing, and daily activities. The adjustable angle features helps to improve the anterior pelvic tilt and erect sitting posture and increase weight bearing. It is used in balance, postural and functional activities.

Adjustable - Height and Tilt adjustments allow therapist to customize the fit for the child as they grow and their therapeutic needs change.

Standard Features

- Height & Tilt Adjustable
- Tool Free Adjustments
- Slotted Legs to adjust height & tilt
- Comfortable cushioned pads

Accessories

- Adjustable Backrest with Lateral Support
- Adjustable Knee Blocks with Abductor
